Decision Dynamics Completes Major Service Contracts with Exploration & Production Companies

Calgary, AB (September 8, 2006) – Decision Dynamics Technology Ltd. (TSX-V:DDY) recently completed service configuration contracts with three major Calgary-based E&P operators representing over \$1million in revenue. These new contracts underline Decision Dynamic's commitment to the business philosophy of providing flexible, scalable software solutions that can be configured to meet a customer's unique workflow.

Decision Dynamics announced the integration of Wellcore's application suites: Well Lifecycle Management and Drilling Operations, in early August and these new service engagements are evidence that there is significant demand from new and existing clients for the new product enhancements. A key component, Wellcore's I.C.E., the Integration and Collaboration Engine, is designed to eliminate departmental data silos allowing clients to recognize the value of Wellcore's newest feature sets. This in turn has spurred growth in service revenue for Decision Dynamics.

The service configuration contracts are for Wellcore based services including AFE integration to leading ERP systems, expanded facilities management implementation and enhanced regulatory functionality. Further projects include enhanced features in Wellcore's Drilling Operations Suite including expanded drilling & completion functionality and configurable workflow management tools. These enhancements give Decision Dynamics the opportunity to assist clients in automating their drilling operations processes.

"The strong demand for Decision Dynamic's service products underline the market's confidence in using Wellcore to speed time to first oil and integrate drilling operations into the enterprise workflow," comments Cecil Shewchuk, CEO of Decision Dynamics Technology.

Wellcore is a well lifecycle management platform that allows exploration and production companies to efficiently manage and optimize well operations. Wellcore can be delivered as a total solution or as point applications to address specific E&P challenges. The Wellcore product family includes: Wellcore Best Practice, an out-of-the-box solution enabling rapid deployment for drilling completion management; Wellcore Enterprise, an enhanced version that can be configured to each customer's business requirements; Wellcore CBM, an edition tailored to the accelerated well development cycle of coal bed methane operations; and Wellcore SAGD, a version designed for use in tar sands projects. Wellcore is available in any combination of modules. Module descriptions and additional information are available at www.ddytech.com/products/wellcore_overview.php.

The Company also announces that due to present circumstances, Mr. Steve Letwin is not able to serve as a director of the company's U.S. subsidiary, Decision Dynamics Technology Inc. and has therefore resigned as a director. It is anticipated that Mr. Letwin will be proposed for election as a director of Decision Dynamics Technology Ltd. at the company's shareholders' meeting in 2007.

About Decision Dynamics Technology Ltd.

Decision Dynamics Technology Ltd. is a leading provider of innovative knowledge capture, workflow management, reporting and analytics software solutions to the energy sector, including major oil and gas and electrical power companies. Its flagship products include Oncore, a project cost management solution that provides real-time cost information, contract validation and approvals for operations management and capital projects; and Wellcore, a well lifecycle management solution that provides oil and gas companies with business visibility and operations agility. The Company has also developed X-Core, a patent-pending, fully integrated, end-to-end data modeling and application development system that can be leveraged across vertical markets. Decision Dynamics is a Microsoft Gold Certified Partner. The Company's head office is located in Calgary, Alberta, Canada. It operates wholly-owned foreign subsidiaries in the United States with offices in Houston, Texas. Decision Dynamics trades on the TSX Venture Exchange under the symbol "DDY".
