Decision Dynamics Opens Denver Office to Serve Rocky Mountain Oil & Gas Companies

Wellcore E&P Software Includes Special Editions for SMBs and CBM Operators

Calgary, AB (October 16, 2006) – Decision Dynamics Technology Ltd. (TSX-V:DDY) announced today that it has opened an office in Denver, Colorado, to serve the large number of upstream oil and gas companies with operations in the Rocky Mountain region of the U.S. The expansion will provide local access to Decision Dynamics' real-time Wellcore drilling operations/well lifecycle management suite and Oncore project cost management software, both designed to improve efficiency, cost controls, compliance and decision making.

Wellcore is a comprehensive integrated suite that provides real-time visibility of all drilling-related data from initial prospect to well abandonment as well as cross-department tools such as AFE, project planning, rig scheduling and electronic permit filing, providing a common interface and automated data population across all applications. The Wellcore platform includes Wellcore SMB and Wellcore CBM, special editions tailored to the needs of small to medium oil and gas companies (SMBs) and coal bed methane (CBM) operators, respectively.

Oncore is the first application that tracks labor, equipment, materials and other costs for capital and operations/maintenance projects by line item in real time, providing benefits including real-time visibility into project cost status, the ability to assess comparative contractor performance, and cost tracking against any mix of parameters.

"Our new Denver office puts us in the heart of the Rocky Mountain E&P action and gives local operators a direct pipeline to our sales and services teams," said Mark Amelang, Decision Dynamics Executive Vice President. "This will allow us to increase our market penetration in the area and ensure that local customers receive the best possible service and support."

Decision Dynamics also has offices in Calgary and Edmonton, Alberta, and in Houston, Texas.

About Decision Dynamics Technology Ltd.

Decision Dynamics Technology Ltd. is a leading provider of innovative knowledge capture, workflow management, reporting and analytics software solutions to the energy sector, including major oil and gas and electrical power companies. Its flagship products include Oncore, a project cost management solution that provides real-time cost information, contract validation and approvals for operations management and capital projects; and Wellcore, a well lifecycle

management solution that provides oil and gas companies with business visibility and operations agility. The Company has also developed X-Core, a patent-pending, fully integrated, end-to-end data modeling and application development system that can be leveraged across vertical markets. Decision Dynamics is a Microsoft Gold Certified Partner. The Company's head office is located in Calgary, Alberta, Canada. It operates wholly-owned foreign subsidiaries in the United States with offices in Houston, Texas, and Denver, Colorado. Decision Dynamics trades on the TSX Venture Exchange under the symbol "DDY".
